I grew up in Sremska Kamenica, suburban neighborhood of Novi Sad, where I also finished elementary school. As a kid I would spend my time reading comics, epic fantasy novels and playing video games. During high school I played guitar in the school orchestra and worked on technical support and special effects for the school theatre. During college I started developing small video games as a hobby and began my career as a freelancer utilizing everything I've learned through education and on my own. I'm passionate about technology and developing creative solutions to whichever problem I come across. I'm an avid reader and music lover.

Professional Resume

EXPERIENCE

2015 - present

Web Developer/Designer

[HTML5/CSS3/JavaScript/Web Design/UXD](#)

Experience in coming up with original web designs, coding responsive semantically correct markup of the design and then adding dynamic features using jQuery/other libs. Experience in A/B (recording the behavior of users and changing the design accordingly).
